### REASONS FOR ALLOWANCE

1. Claims 1-13 allowed over prior art.
2. The following is an examiner's statement of reasons for allowance: the prior art made of record does not teach or fairly suggest in combination the step of selecting, on a transmission side, a burst length of interleaving from among values that are multiples of the predetermined number and that are divisors of a total number of bits of data signals included in each of the radio blocks, and transmitting the burst length to a reception side.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yang (US 5,889,791) discloses system, device and method of FEC coding and interleaving for variable length burst transmission.

Peeters (US 6,151,690) discloses an interleaving and de-interleaving method for digital data, interleaving and de-interleaving devices, and communication system.

Yamashita (US 6,564,343 B1) discloses a bit interleaving circuit and bit de-interleaving circuit.

Art Unit: 2664

Combelles et al (US 6,192,493 B1) discloses data element interleaving/de-interleaving.
